

# Gas Distribution Approved Products

We provide comprehensive actuated control solutions for the UK's gas distribution network, leveraging our extensive expertise to ensure optimal performance and reliability.

- Fully approved GIS V6 valves with GIS VA1 and VA2 actuators
- Control systems in accordance with GIS VA1 control types A/B/C/D
- On-site installation and commissioning
- Ongoing maintenance and servicing
- Access to our expert team

### Products in stock for fast-track delivery

With millions of pounds worth of stock available for accelerated delivery, we're ready to help if you require short lead times or are unable to access valves from your usual supplier. All of our products are supplied with full traceability, and we can rely on the quality and support of our manufacturing partners.

**Perar**

**Stock range**  
1" - 24" with a mixture of #300 and #600

Larger sizes are available on request

One of the leading Italian manufacturers of high quality industrial valves for a wide variety of applications. A National Gas qualified vendor to T/PM/QA/7 and T/SP/V/6 with global approvals and references. Here at AC Valve Alliance, we carry a vast stock of Perar ball valves which are available for fast-track delivery.

**GALLI & CASSINA**  
Plus SINCE 1919

**Stock range**  
1/2" - 12" with a mixture of screwed and flanged connections #300 and #600

Larger sizes are available on request

Leading plug valve supplier, Galli & Casina, have been manufacturing carbon steel lubricated plug valves in Italy since 1919 and are fully approved to be used on the UK's gas network as a National Gas qualified vendor.

**AIR TORQUE**

**Torque range**  
600Nm - 39,000Nm

Larger torques are available on request

We carry extensive stock of VA1 approved gas operated scotch yoke actuators. Founded in 1990 in Italy, Air Torque produce carbon steel Heavy Duty scotch yoke pneumatic and hydraulic actuators with a compact version completing the evolution of their range. Air Torque have National Gas VA1 approval together with SIL, ATEX, and CE approvals.

**auma**  
Solutions for a world in motion

**Torque range**  
10Nm - 32,000Nm

Larger torques are available on request

AUMA electric actuators are German-designed and manufactured to deliver exceptional control and reliability. AUMA are ATEX certified as well as National Gas VA2 approved for supply into the UK gas distribution network. Our engineers are fully ACE trained and certified, meaning that our team are fully qualified for correct mounting, commissioning and testing of AUMA equipment.
