What we do

We offer comprehensive stock, bespoke solutions, and advice you can trust.

We provide high-quality valves and actuators from our extensive stock or through approved manufacturers, alongside bespoke, end-to-end engineered packages tailored to your requirements. Covering valve packages, manufacturing, pipe skids, testing, one-off items, and full project support, we provide expertise at every stage to solve problems and remove the complexity from your engineering requirements.

1

Trusted partner

to simplify your supply chain

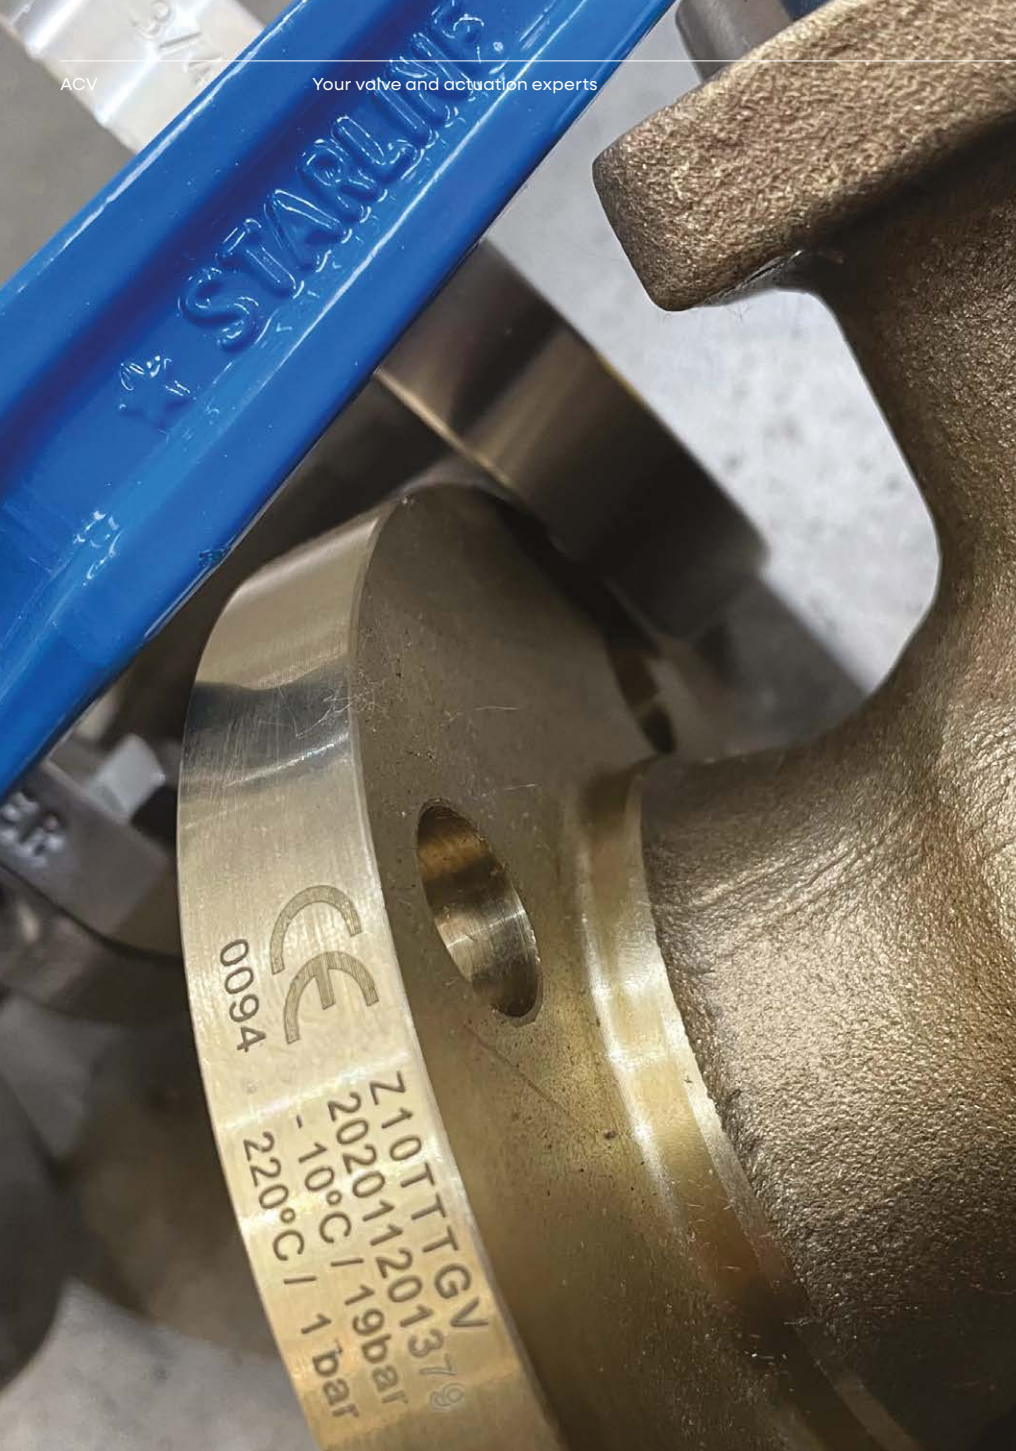

Operating out of our custom facilities in the heart of the UK and the Netherlands, we pride ourselves on both our technical knowledge and world-class customer service – we've built a reputation for flexibility, innovative solutions, fast-tracked stock, and world-class support from our team of expert consultants.

Together, we offer a host of products and services; from valve modification, automation, and pipe skids to testing, project supply, and even designing and manufacturing our own valves to fit our customers' needs. Our enhanced workshop facilities ensure we're positioned to offer a rapid, personalised response and ready to solve a wide range of engineering issues.

With millions of pounds worth of stock for expedited delivery, we're ready to help if you're experiencing long lead times or plant shutdowns. All of our products are supplied with full traceability, and we can rely on the quality and support of our manufacturing partners.

Our products

ACV delivers end-to-end valve and automation solutions across the oil, gas, petrochemical, energy, and general process industries. We support our customers with integrated isolation, control, and actuation solutions, ensuring correct specification and dependable long-term performance.

We operate as a global stockist and distributor, holding one of the largest ball valve stocks in Europe. Our range includes metal seated, cryogenic, and exotic material options from trusted supply partners, ensuring we can meet our customers' ever-changing demands with readily available stock.

Floating ball valves

Trunnion mounted ball valves

Pneumatic actuators

Electric actuators

Electro-hydraulic actuators

Control valves

Safety relief valves

Lubricated and dual expanding plug valves

Butterfly valves

Transformer valves

Lined ball valves

Line blinds

We can also supply many other valve types, including damper, gate, globe, and check valves.

Our principal supply partners

Our exclusive partnerships with these trusted names allow us to deliver you an extensive range of valves and actuators. Suited to a range of industrial applications, these products provide you the highest standards of quality and performance.

These relationships ensure we offer only the best and most current products, placing us at the forefront of ever-changing demands for new materials, special testing, product qualification, and approvals.

Supply partners

We have close ties with many key industry brands and act as the exclusive UK distributor on their behalf.

"We have been business partners and friends with ACV for over 25 years. During that time, professionalism, efficiency, great service, and credibility have become synonymous with the group. They are always a pleasure to work with and we look forward to many more years collaborating on this special partnership."

Daniel Arranz
CEO, Synerkos Group

Pekos

Pekos are a leading European manufacturer of floating ball and trunnion-mounted ball valves with over 30 years of experience. They have the capability to supply the complete range of valve types, sizes, materials, and pressure classes to meet most specifications and industrial applications whilst complying with all major international standards. They are also unique as a manufacturer because of their vast stock holding of complete assembled valves, ready to ship.

 **Pekos**
Ball Valves

Starline

Manufacturing in Italy since 1976, Starline have developed a comprehensive range of ball valves in different materials and executions, including floating ball, trunnion-mounted, single/double block and bleed, metal-to-metal, cryogenic, and high-temperature designs with major worldwide approvals. In a unique collaboration with Starline UK, ACV offer fast-track delivery options, with valves fully manufactured in the UK under a licence agreement.

 **STARLINE**
forged steel ball valves

Perar

Manufacturing API6D and API6A ball valves in Italy since 1962, Perar supply floating type, trunnion-mounted side entry and top entry, metal-seated, subsea and cryogenic, bolted and fully-welded body valves. They are fully approved to be used on the UK's gas network as a National Gas qualified vendor to T/PM/QA/7 and GIS V6, and hold many significant global Oil & Gas approvals.

Zwick

Manufacturing in Germany for over 40 years, Zwick Armaturen specialise in high-integrity, triple offset butterfly valves designed for demanding and critical service duties. Their range covers severe temperature and pressure applications with bi-directional zero leakage performance and fire-safe, metal-seated construction. Zwick valves are widely used across global energy and process industries, and comply with major international standards and approvals.

Severn

Offering high-performance, bespoke control valves engineered for precise, stable flow control in critical applications, Severn control valves are designed for accuracy, repeatability, and long-term reliability. Manufacturing since 1957, Severn valves utilise advanced trim designs and robust construction to handle critical and severe service conditions. Suitable for demanding duties, including high temperature, high pressure, and specialist process environments where control performance is critical.

Rotex

Established in 1967, Rotex offer robust electro-hydraulic actuator solutions, including fail-safe operation, solenoid valves, and positioners designed for reliable and responsive valve control. Engineered for durability and consistent performance, Rotex products support precise modulation and on/off operation across a wide range of applications and are suitable for integration into automated valve systems where dependable actuation and control accuracy are essential.

Galli & Cassina

Galli & Cassina have been manufacturing plug valves in Italy since 1919. Main products include pressure-balanced, metal-seated, lubricated plug valves and dual-seal, DB&B soft-seated expanding plug valves. They are fully approved to be used on the UK's gas network as a National Gas qualified vendor to T/PM/QA/7 and GIS V6; they also hold many other worldwide approvals.

Air Torque

Founded in 1990 in Italy, Air Torque S.P.A. is one of the world's leading manufacturers of pneumatic rack and pinion actuators in aluminium, as well as full stainless steel. They also produce carbon steel, heavy duty, scotch yoke pneumatic and hydraulic actuators, with a compact version completing the evolution of their range. Air Torque have National Gas VA1 approval together with SIL, ATEX and CE approvals.

TVS

Based in the UK with over 20 years of experience, TVS form part of ACV and manufacture fast-track ball valves and engineered valve solutions for severe and time-critical applications. Our range includes transformer and radiator butterfly, floating and trunnion-mounted designs in a variety of materials and pressure classes, supported by rapid manufacturing and modification capabilities. TVS focus on responsive delivery, technical flexibility, and bespoke solutions tailored to project requirements.

Valnac

Valnac (formerly Válvulas Nacional) have been designing and manufacturing safety relief valves in Spain since 1976. Their extensive product range includes conventional and bellows design safety relief valves as well as pilot-operated safety valves. For a complete package, Valnac also manufactures breather valves, emergency vent valves, and silencers.

Our services

ACV is committed to providing comprehensive valve solutions, backed by quality products, technical expertise, and responsive customer support. Whether it's supplying off-the-shelf valves, designing custom solutions, or providing aftermarket services, we strive to meet the diverse needs of our customers across various industries.

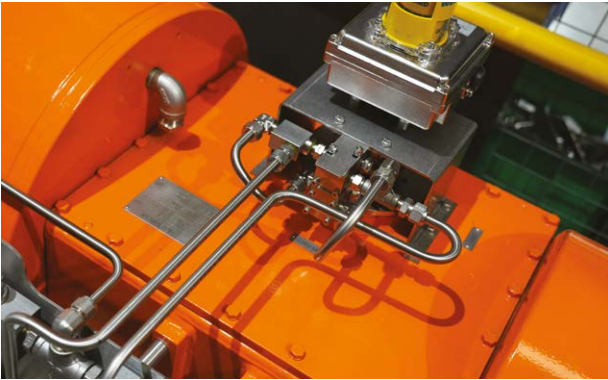

Project supply

The industry experience of our dedicated Projects Team lets us understand your requirements, working with your AVL to complete projects on time, to cost, and to customer specification. We utilise our depth of stock and also offer comprehensive valve and actuator sourcing to meet your needs, including manual and actuated, ball, control, needle valve, DBB, gate, globe, check, butterfly, and safety valve products.

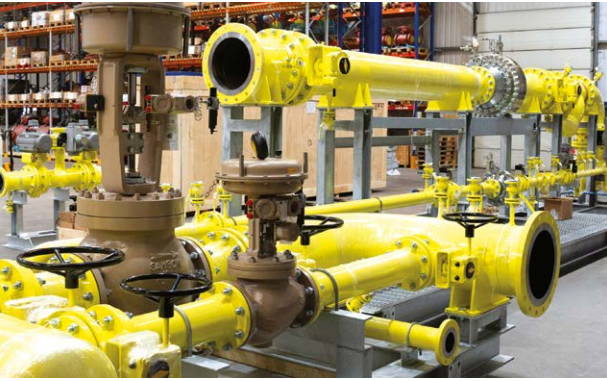

Valve manufacturing

Our in-house team of experts will provide valves designed and manufactured to your specification using Western-European materials, putting them through rigorous testing and machining using the latest CNC technology at our facilities to achieve a fast-track delivery. Our UK manufacturing brands include TVS, which provides bespoke severe service ball valves, and Starline UK which manufactures ball valves under licence in the UK, both fully certified to the PED and PESR regulations.

Valve automation

We provide automation solutions tailored to your requirements as well as fast-track 'off the shelf packages' utilising our extensive stock range of pneumatic, electrohydraulic, and electric actuators, mounting kits, solenoid switchboxes, and piping / fitting, which complement our in-house range of valves. We also provide full automation services for free-issue valves.

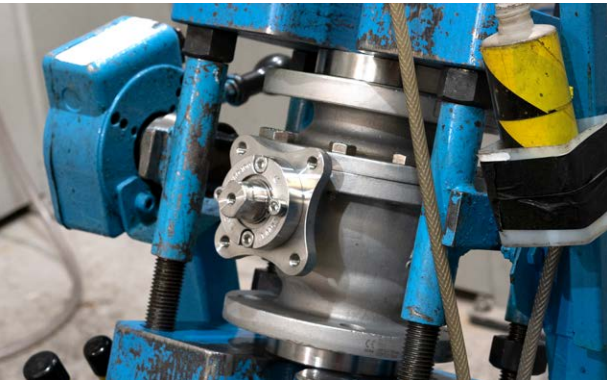

Pipe & skid solutions

We offer a complete skid-mounted mechanical and electrical system ready to be installed on site. Built by our experienced engineers to a client's own design, or designed in-house using leading 3D modelling software, we can produce our compact and economic skid solutions working from P&IDs following the latest codes and regulations. This is all completed with a dedicated UK team and guaranteed high-quality approach.

Valve modification

We hold a comprehensive range of OEM spare parts and can upgrade materials and components to meet diverse technical requirements. We stock over 25 grades of O-rings and offer full aftermarket support, including repair, refurbishment, and retesting. Our valve engineering expertise ensures material and component upgrades, supported by our extensive workshop facilities for comprehensive product maintenance.

Valve testing

To fulfil the increasing demand for more stringent product verification, we offer a full in-house test facility providing hydrostatic, pneumatic, fugitive emission (helium), and high-pressure nitrogen gas. Our in-house fire test facility can accommodate fire testing to the latest international standards across a wide range of valve types. We have a safe contained test environment with remote monitoring and hydrogen testing capabilities.

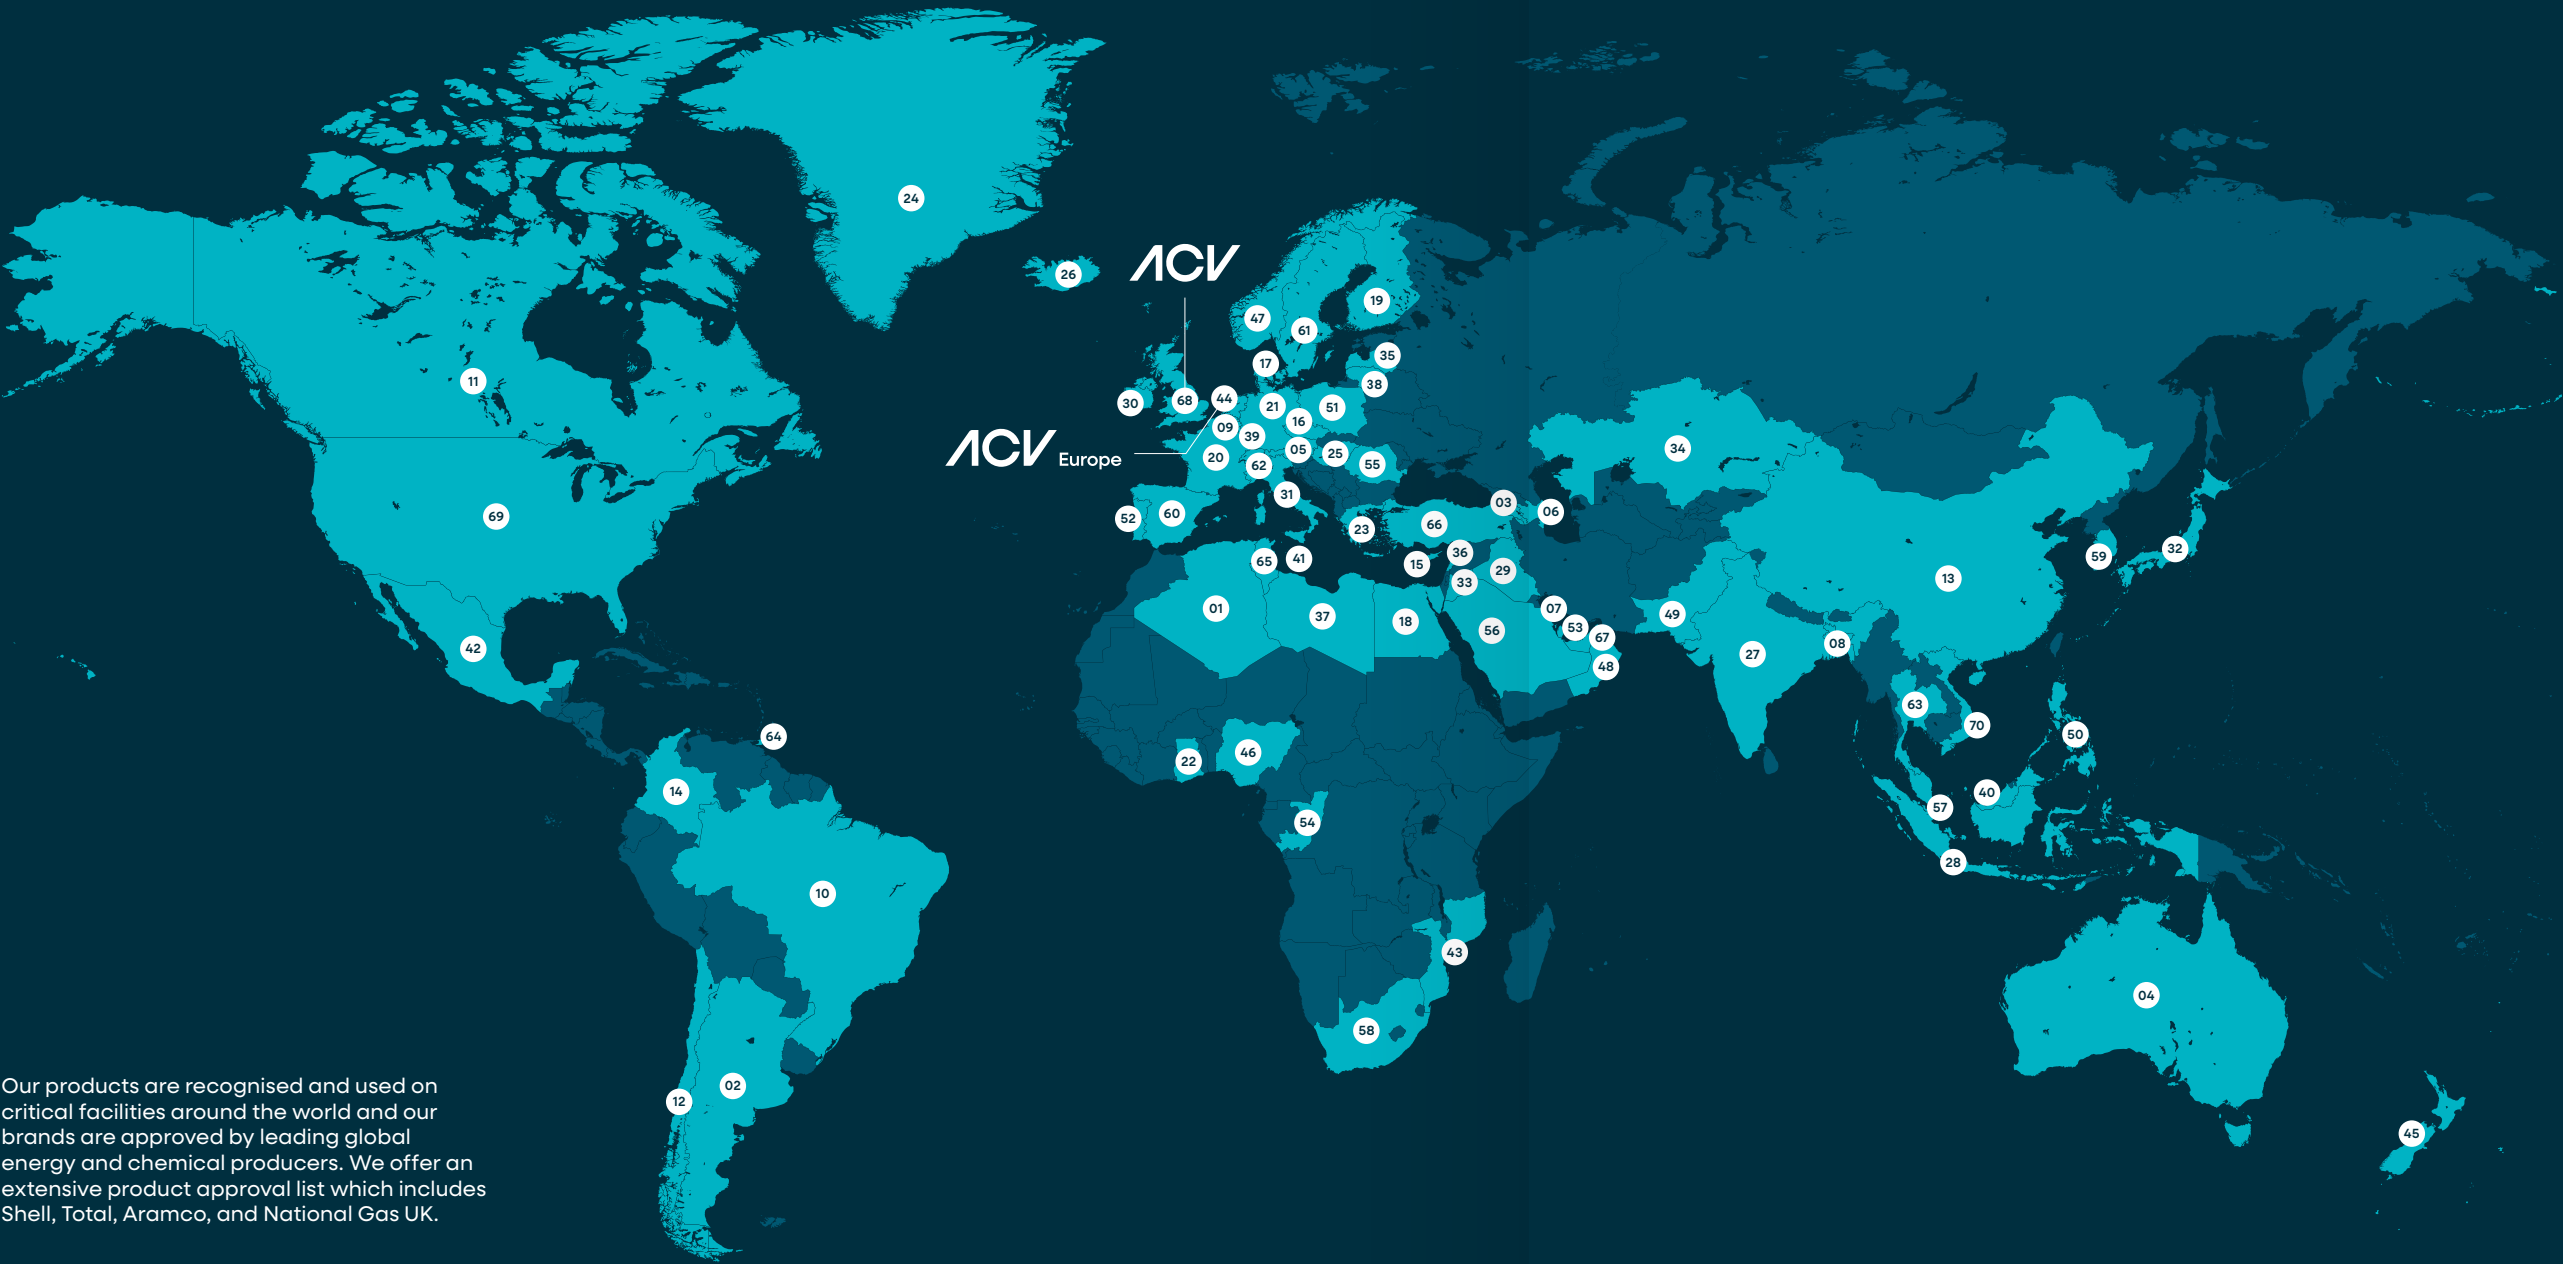

Valve & actuation training

With years of experience in developing training courses for our own team, we have designed these sessions for both existing and prospective customers. The training provides in-depth knowledge on the operation, maintenance, and optimisation of our valves and actuators. Whether you're looking to enhance your team's technical skills or ensure safe and efficient system performance, our expert-led courses will equip you with the tools and confidence to succeed.

Global projects

Our headquarters are at the heart of the UK and our European warehouse is strategically placed in the Netherlands, which gives us the freedom and ideal global positioning to reach wherever your project needs us.

Our products are recognised and used on critical facilities around the world and our brands are approved by leading global energy and chemical producers. We offer an extensive product approval list which includes Shell, Total, Aramco, and National Gas UK.

Specialist applications

Our expert engineering knowledge and capability, combined with our bespoke workshop facility, ensures that even your most complex specialist application requirements can be met. We offer a wide range of products and services, including valve/pipe skids and automation modifications, in-house testing, and manufacturing our own UK-designed valves.

“ACV are a long-standing supplier who understands our business and are easy to work with. They offer quality products with the technical knowledge to support these products.”

Valued ACV customer

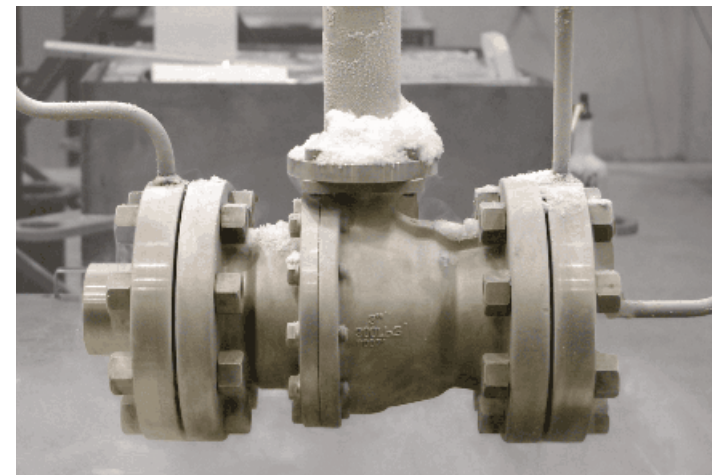

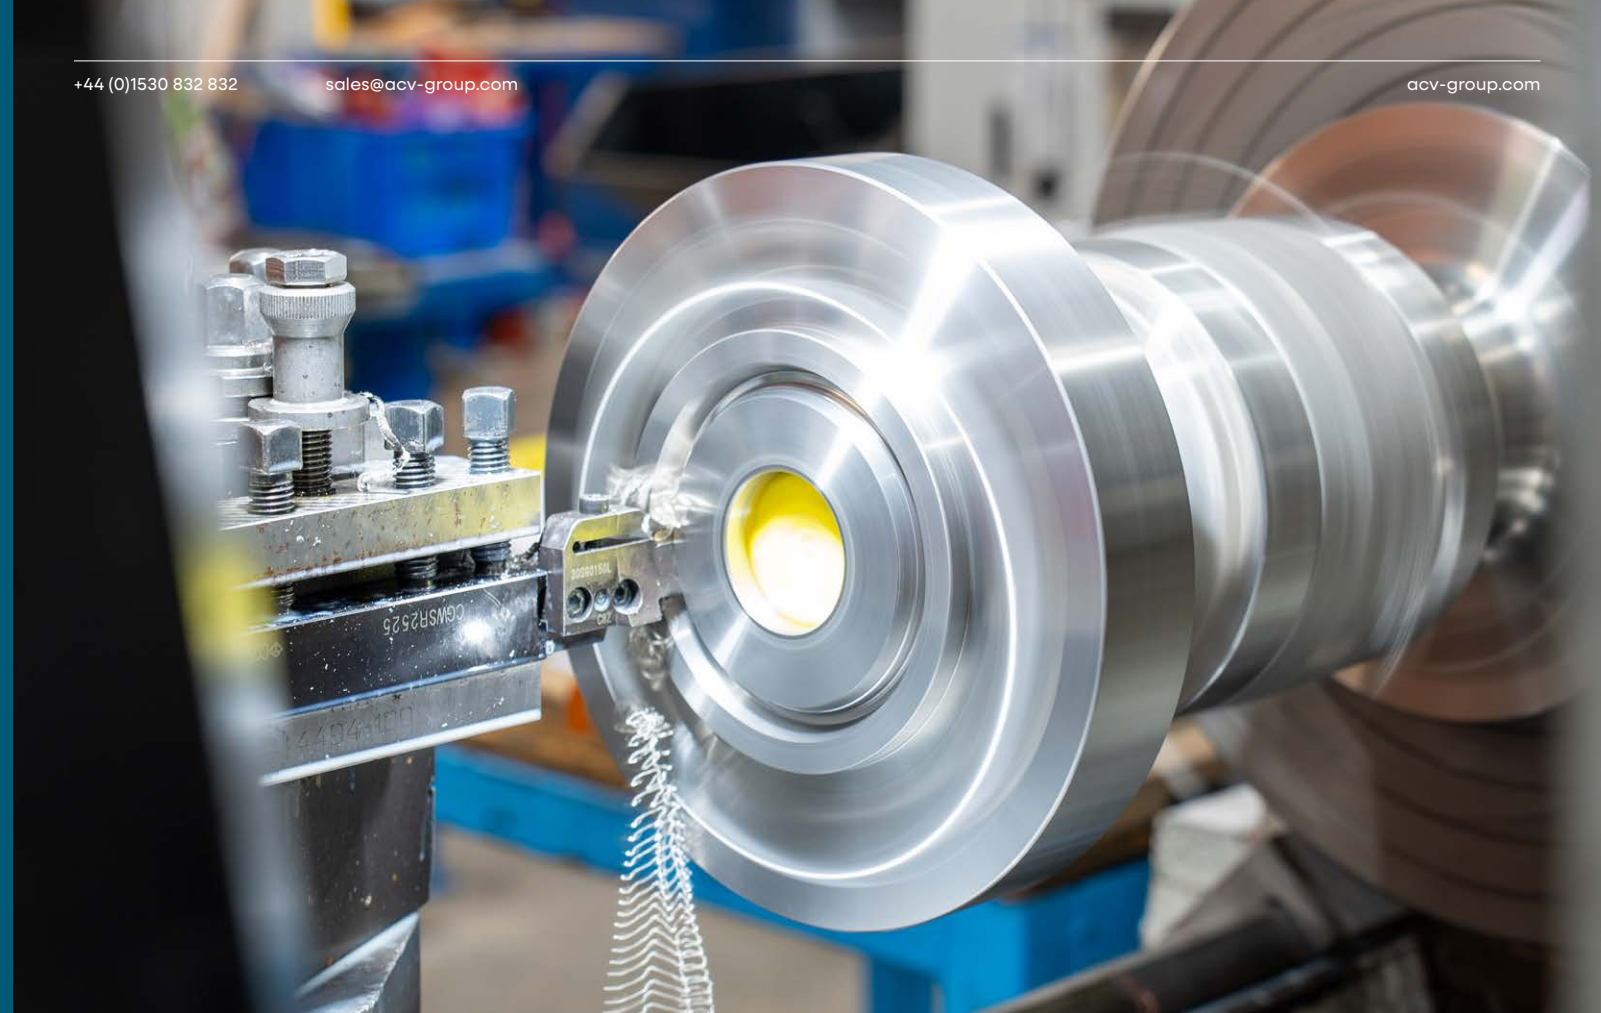

Hydrogen

We have excellent solutions from all our quality European brands as well as facilities for stringent helium testing, ensuring zero leakage together with FET-type approval qualifications.

High temperature and abrasion

We have developed a comprehensive stock of metal seated ball valves. As designs can vary depending on the detailed application, we offer flexible, quality solutions from stock, upgraded stock or manufactured to order.

Cryogenics

We stock valves already prepared for cryogenic duties and can modify standard valves if needed. Our valve manufacturing partners carry out low-temperature assessments, and our valves can be tested at low temperatures to demonstrate performance.

Tank storage

We have extensive experience in providing full tank storage valve and automation solutions for fill protection, double block and bleed, plant shutdown, and fast-track requirements.

Why choose us?

At ACV, our extensive knowledge of valves and automation make us the ideal supplier for your requirements. We're dedicated to assisting our customers, achieved through substantial investments in both our stock and facilities, as well as our team. With our friendly and knowledgeable approach, we're committed to guiding customers in selecting the right products and packages.

Valve supply

We maintain close partnerships with high-quality European valve and actuator manufacturers, ensuring our extensive stock is ready for fast-track delivery to your door. Our global list of approved suppliers offers worldwide reach, including Asia.

Global

We have been in the industry for over 25 years and are a globally trusted partner for many large-scale projects. Operating out of the UK and Netherlands, we can deliver to you directly.

In-house engineering

Our technical facilities can test and modify valves to suit your bespoke project requirements. Our employees have a wealth of first-class engineering experience and knowledge.

Efficiency

By committing to continual investment in our staff, facilities, and services, we ensure that all your dealings with us are handled quickly, correctly, in the best engineered and cost-effective ways.
