

Valve & actuation training

Expert-led valve and actuation training
programme for hands-on, tailored
industry education

“An excellent training session for those wanting a deeper understanding of valve design and selection.”

Valued ACV customer

Expert-led training in valve and actuation operations

Our Valve and Actuation Training programme offers comprehensive, hands-on education tailored to your needs, using our industry-leading products.

With years of experience in developing training courses for our own team, we have designed these sessions for both existing and prospective customers. The training provides in-depth knowledge on the operation, maintenance, and optimisation

of our valves and actuators. Whether you're looking to enhance your team's technical skills or ensure safe and efficient system performance, our expert-led courses will equip you with the tools and confidence to succeed.

Contact us today to learn how this training can benefit your organisation

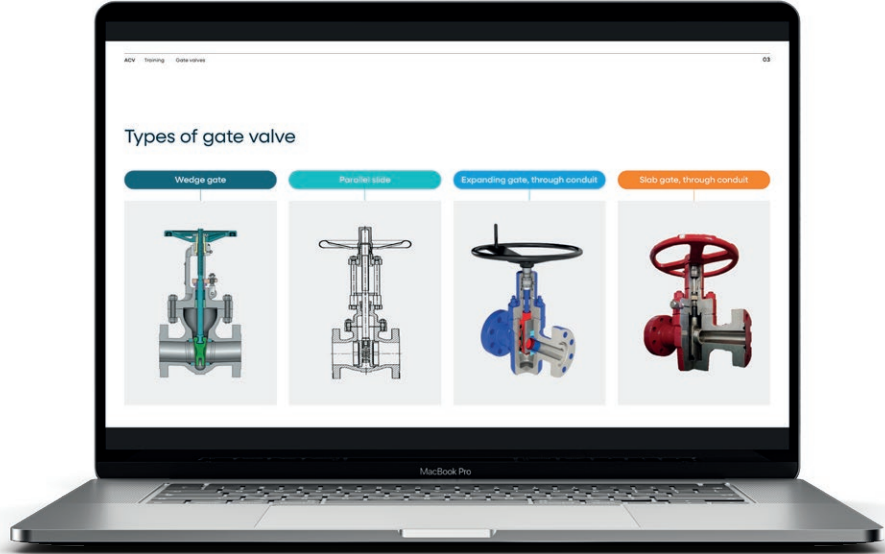

Benefits

- Advance your professional development
- Strengthen your team's technical expertise
- Provide robust support for industry newcomers
- Receive hands-on, tailored education with our industry-leading products
- Develop in-depth knowledge of our products and services offering
- Ensure the safe and efficient performance of installed systems
- Learn the operation, maintenance, and optimisation of our valves and actuators in detail
- Training can be delivered at our dedicated facilities or directly on-site

Explore our training courses

Find the course that interests you most and best supports your professional development.

We offer a wide range of options, from foundational basics to advanced and technical aspects of valve operations and maintenance. Feel free to contact us to learn more about our courses or to ask general questions about our wider valve products and services.

Types of gate valve
Gate Valves training course

Beginner

Three beginner courses can typically be completed in half a day.

- Manufacturing methods processes
- Floating ball valves for beginners
- Introduction to Starline and Pekos
- Plug valves
- Globe valves
- Gate valves
- Knife gate valves
- Diaphragm and pinch valves
- Concentric butterfly valves
- Check valves
- Reading a test certificate - Beginner

Intermediate

Two intermediate courses can typically be completed in half a day.

- Before we do valves
- An introduction to valves
- Floating ball valves - Intermediate
- Seats and seals - low pressure
- Seats and seals - high pressure
- Trunnion mounted ball valve
- Double offset butterfly valves
- 3 way porting configurations
- Testing
- Reading a test certificate - Intermediate
- Actuator training
- Control valves

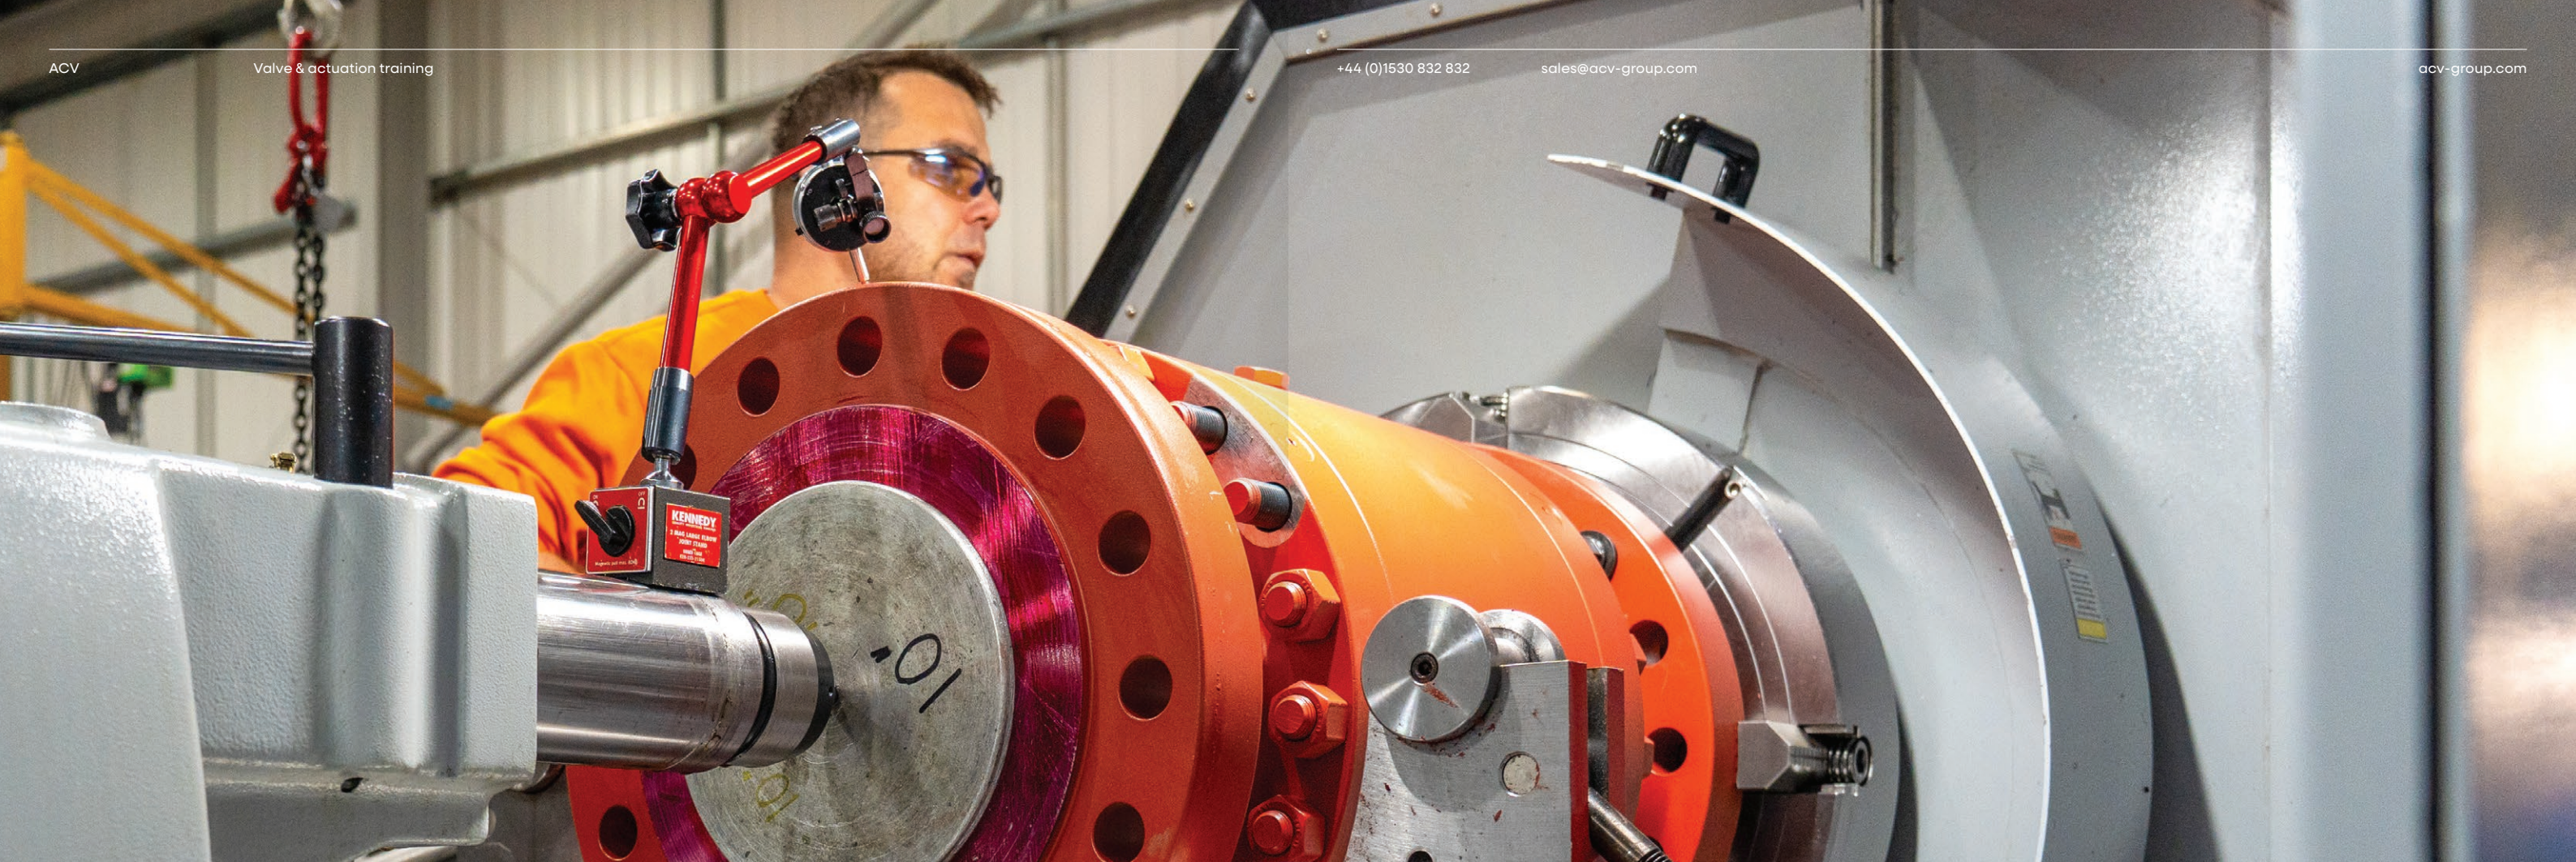

Advanced

One advanced course can typically be completed in half a day.

- Elastomers (O-Rings)
- Perar double piston effect seats (DPE)
- API6D
- Bolting
- Actuators vs valves
- Triple offset butterfly valves
- Specific applications
- Hydrogen
- Fire testing and certification
- National Gas standards
- Cryogenics
- Safety relief valves
- Pneumatic actuation
- Electric actuation
- Hydraulic actuation
- Galli & Cassina double expanding
- API 6D plug valves

Bespoke training can be offered to suit your individual requirements

Additional course information

£

Cost of course

We offer a selection of free courses for both existing and new customers. Additionally, we provide a wide range of in-depth training programmes tailored to suit various budgets. Contact us to discuss your training needs and find the right course for you.

Accommodation

We recommend the following hotels at competitive rates: The Field Head (5 minute drive to ACV offices), Holiday Inn at St Nicholas Circle (30 minute drive) and Novotel Leicester located near the city centre (30 minute drive).

If you wish to stay in the city centre, we recommend the Holiday Inn and Novotel Leicester hotel venues. We can also suggest an assortment of restaurants and cafes to suit a variety of tastes and preferences.

Enhance your skills at our dedicated valve automation facilities

Experience hands-on training at our dedicated valve automation facilities, where you can explore our extensive valve stock, meet the team behind ACV, and witness our in-house engineering department in action.

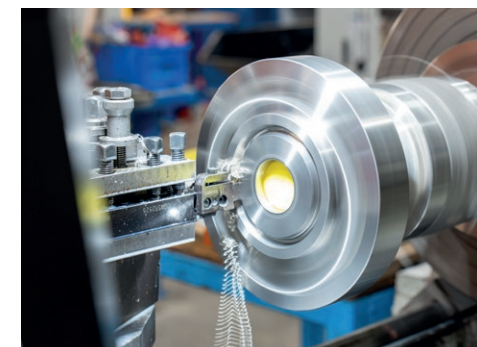

See our stock

We offer one of Europe's largest and most comprehensive valve stock ranges, with pre-made and custom solutions available for immediate delivery. Our extensive inventory meets diverse needs, while our custom manufacturing ensures tailored solutions for unique applications, minimising downtime and maximising efficiency.

Meet the team

From testing, manufacturing, pipe skids through to our documentation team, our team of experts are here to answer your questions through our training courses, guided by our team of professionals.

In-house engineering department

Take a tour around our valve and automation facilities which include our comprehensive testing offering, valve modification, actuation services, valve manufacturing and pipe skid fabrication.
